ELSEVIER

Journal of Materials Processing Technology 72 (1997) 454–456

Journal of Materials Processing Technology

Contents of Volume 72

A study on the mirror-like grinding of MgO single crystal with various diamond wheels 1
J.-D. Kim, E.-S. Lee

The influence of material defects on the forming ability of sheet metal 11
J.D. Bressan

Composite material die swell: gauge prediction for steel belts 15
Y.-J. Lin, E.D. Gregg

Research on ring structure wire-rope isolators 24
C. Weimin, L. Gang, C. Wei

Research on the integral hydrobulge forming of ellipsoidal shells 28
Z. Yuansong, Y. Shijian, W. Fengzhi, Z.R. Wang

A study of void crushing in large forgings
II. Estimation of bonding efficiency by finite-element analysis 32
C.Y. Park, D.Y. Yang

An accuracy model for the peripheral milling of aluminum alloys using response surface design 42
K.-H. Fuh, H.-Y. Chang

Simulation of sheet metal forming using explicit finite-element techniques: effect of material and forming characteristics
Part 1. Deep-drawing of cylindrical cups 48
A.G. Mamalis, D.E. Manolakos, A.K. Baldoukas

Grinding of cemented carbide with electrical spark assistance 61
P. Koshy, V.K. Jain, G.K. Lal

Application of a genetic algorithm to the optimal design of the die shape in extrusion 69
J.S. Chung, S.M. Hwang

Hot torsion tests to model the deformation behavior of aluminium alloys at hot working temperatures 78
M. Zhou, M.P. Clode

Determination of the initial billet geometry for a forged product using neural networks 86
D.J. Kim, B.M. Kim, J.C. Choi

An upper-bound analysis of metal forming processes by nodal velocity fields using a shape function 94
J.W. Park, Y.H. Kim, W.B. Bae

The influence of surface defects on the forming-limit diagram of sheet metal 102
T. Hiroi, H. Nishimura

Simulation of sheet metal forming using explicit finite element techniques: effect of material and forming characteristics
Part 2. Deep-drawing of square cups 110
A.G. Mamalis, D.E. Manolakos, A.K. Baldoukas

An exploration of the hydraulic-pressure assisted redrawing of cups 117
S. Thiruvarudchelvan, F.W. Travis

Effect of increasing deposition rate on the bead geometry of submerged arc welds 124
R.S. Chandel, H.P. Seow, F.L. Cheong

Finite-element simulation of the shear process using the element-kill method 129
D.-C. Ko, B.-M. Kim, J.-C. Choi

An upper-bound elemental technique approach to the process design of asymmetric forgings 141
J.-H. Lee, Y.-H. Kim, W.-B. Bae

Micromechanical solidification heat transfer and initial strain estimation in the fabrication process of particles-reinforced aluminum composites 152
Y.H. Seo, C.G. Kang

Elsevier Science S.A.

Bearing lengths for extrusion dies: rationale, current practice and requirements for automation 162
N. Miles, G. Evans, A. Middleditch

Extrusion die for in-process compensation of component-errors due to die-elasticity 177
T. Wanheim, R. Balendra, Y. Qin

Superplastic forming technology of aircraft structures for Al–Li alloy and high-strength Al alloy. 183
X. Yuwei, Z. Yiyuan, M. Wenfeng, C. Jainzhong

Finite-element analysis and experimental verification for drawbead drawing processes. 188
C. Kim, Y. Im, Y. Heo, N. Kim, G. Jun, D. Seo

Frictional behaviour of Al359/SiC/20p composite under isothermal and non-isothermal hot-working conditions as a function of surface roughness 195
A.M. de Sanctis, A. Forcellese, S.M. Roberts, P.J. Withers

Salient features in the cold upset-forming of sintered aluminium–3.5% alumina powder composite preforms 201
R. Narayanasamy, K.S. Pandey

Effects of cutting parameters on the scallop size during the milling processes 208
C.-C. Tsao, W.-C. Chen

Rolling of internal threads: Part 1 214
V. Ivanov, V. Kirov

Rolling of internal threads: Part 2 221
V. Ivanov

Multiple-slide transfer presses: A modern production system 226
P. Bogon

Strengthening of cold-setting resin sand by the additive method 239
G. Ding, Q. Zhang, Y. Zhou

Extrusion of TiO_2 ceramic powder paste. 243
L. Chevalier, E. Hammond, A. Poitou

Wear resistance of Al_2O_3/TiB_2 ceramic cutting tools in sliding wear tests and in machining processes 249
D. Jianxin, A. Xing

Prediction of the maximum drawing load in the cup-drawing process of sheet metals. 256
D.-K. Leu

Dynamic behavior modeling for P/M superalloys during hot isostatic pressing. 262
M.C. Zhang, Z.J. Luo, F.C. Zeng

Investigations of new wax-based model materials simulating metal working process. 267
K. Świątkowski, R. Cacko

Physical modelling of metal working processes using wax-based model materials 272
K. Świątkowski

A computer model for relating powder density to composition, employing simulations of dense random packings of monosized and bimodal spherical particles. 277
L.N. Smith, P.S. Midha

Hot rolling of an aluminum alloy using oil/water emulsions 283
M.S. Chun, J.G. Lenard

A study of friction during the lubricated cold rolling of an aluminum alloy 293
J.G. Lenard, S. Zhang

Stress-state dependence of work-hardening behavior in aluminium alloy sheet 302
R. Mahmudi

On a physico-metallurgically justified inter-annealing schedule for copper. 308
W.A. Acho, G.I. Lawal

Improvement of metal forming processes by means of useful effects of plastic friction 314
A.N. Levanov

Automated selection of cutting tools based on solid models. 317
A.C. Lin, C.-L. Wei

Acrylic-acid route for the fast chemical vapour deposition of titanium carbide films 330
S. López, S. Granados, S. Muhl, O. Alvarez-Fregoso, J.A. Chavez-Carvayar

Optimizing flow in plastic injection molding 333
L.W. Seow, Y.C. Lam

New developments in sheet metal forming: Sheet materials, tools and machinery 342
H.-W. Wagener

The numerical simulation of the integral hydrobulging of ellipsoidal shells 358
Z. Yuansong, Z.R. Wang, Y. Shijian

Optimization of the tool geometry in the deep drawing of aluminium 363
M.M. Moshksar, A. Zamanian

A study on flash- and flashless-precision forging by the upper-bound elemental technique 371
J.-H. Lee, Y.-H. Kim, W.-B. Bae

Property improvement in Al–Si alloys through rapid solidification processing 380
R. Dasgupta

The effects of ball- and roller-burnishing on the surface roughness and hardness of some non-ferrous metals 385
A.M. Hassan

Simulation of isothermal forging of compressor disc by combined numerical and physical modelling techniques 392
A. Dutta, A.V. Rao

Development of a three-dimensional finite-element program for metal forming and its application to precision coining . 396
H.-H. Choi, J.-H. Lee, S.-K. Bijun, B.-S. Kang

Study on isothermal precision forging technology for a cylindrical aluminium-alloy housing 403
D.B. Shan, Z. Wang, Y. Lu, K.M. Xue

Design of strain-rate-controlled dies for the die drawing of polymer sheet 407
A. Masoumi, G. Craggs

Surface integrity and fatigue life of turned gamma titanium aluminide 413
A.L. Mantle, D.K. Aspinwall

Analysis of die design for the stamping of a bathtub 421
F.-K. Chen, B.-H. Chiang

Isothermal plastic forming of high melting temperature alloys 429
J. Sinczak, W. Lapkowski, S. Rusz

On the properties and structure of micro-alloyed and copper-bearing hot-rolled steels 434
F.A. Khalid, D.V. Edmonds

Numerical analysis of the arc in pulsed current gas tungsten arc welding using a boundary-fitted coordinate 437
H.G. Fan, Y.W. Shi, S.J. Na

Friction surfacing of metal coatings on steel and aluminum substrate 446
M. Chandrasekaran, A.W. Batchelor, S. Jana
